AUTOMATIC PACKAGING OF COB CORN

The Formost Cob Corn Feed System automatically meters, collates, groups and times frozen cob corn into the infeed flights of a Fuji Formost wrapper or Formost bagger for packaging. The system matches the flow of product to the speed of the wrapper or bagger.

Application: Cob Corn Packaging

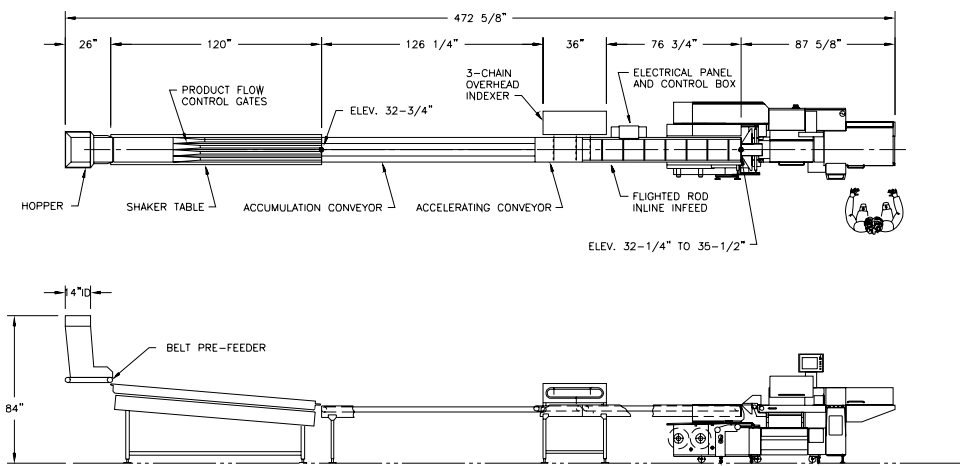

Product is collated on the shaker table and the high-speed accumulation conveyor. Corn is aligned and separated into lanes and the accumulation conveyor accelerates the corn away from the shaker table. The corn is then timed into the wrapper flights by the grouper assembly.
