Quality is "First and Formost"

POSITIVE PRODUCT CONTROL

LABOR SAVINGS

CUP WRAPPING & STACKING

PROVEN PERFORMANCE

UP TO 210 CUPS PER MINUTE

Cup Wrapping System for Bulk Case Packing

The Formost Single Cup Wrapping System is designed to wrap individual cups, at speeds up to 210 cups per minute, stack them in counts ranging from 15 to 50 and then compress them into compact stacks.

Built for high performance, outstanding flexibility and dependability, Fuji-Formost Horizontal Servo Wrappers are a productivity leader in any packaging operation.

FORMOST FUJI

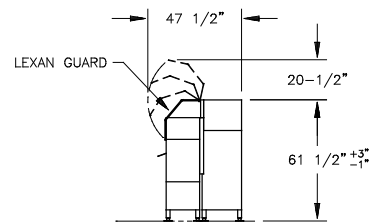

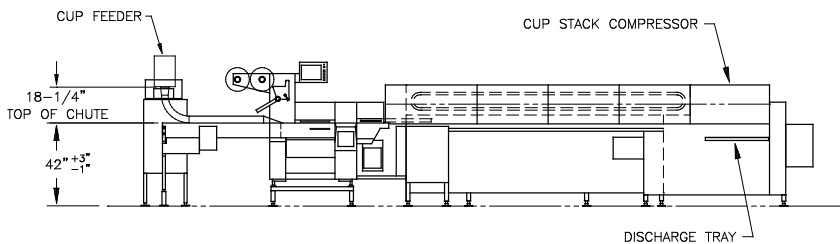

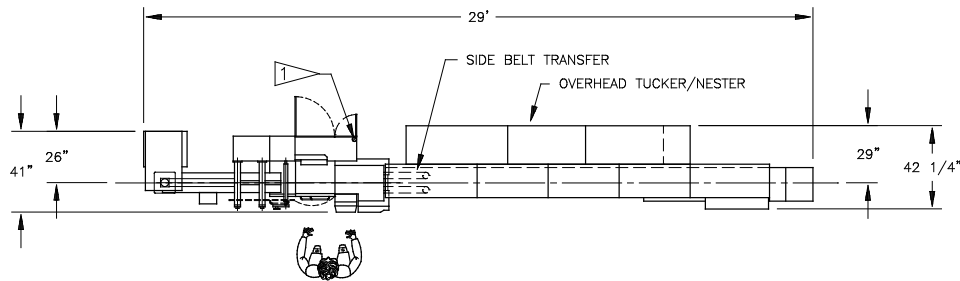

Application: Plastic Cup Wrapping & Stacking

The cup feeder releases cups into the wrapper infeed and the cups are then wrapped individually and discharged onto the overhead tucker. Each wrapped cup is picked up by a paddle arm that tucks the excess film inside the cup then deposits it at the stacker/compressor. The cups accumulate there until the cup count is reached. When the stack is complete the compressor will move the stack into the carriage and against the carriage backstop where the cup stack is compressed. The backstop then retracts and the carriage will rotate to release the completed stack from the machine.

FORMOST® MACHINERY SHOWN

- (1) R.H. FW3400 ALPHA 5 SERVO WRAPPER
- (1) 60" LONG INFEED CONVEYOR WITH CUP FEEDER
- (1) SIDE BELT TRANSFER ASSEMBLY
